

EdiCube

Edicube Series features outstanding lumen output with low power consumption. With secondary optical lens on LED, the emitting angle can be widened so that the module presents excellent light uniformity. Edicube Series is an energy-saving and high efficient solution for TV backlight, panel light and advertising light box.

Features:

- High uniformity with no glare
- With secondary optical lens, wide angle $> 145^\circ$
- High lm/\$ and cost saving

Applications:

- Advertising Billboard
- Exit signs
- Panel light
