

EdiLex Strip Lighting Module

EdiLex strip lighting module are linear white-light LED Strips. They are intended for luminaire manufacturers who want to replace linear fluorescent luminaires with LED solutions. The LED Strip can be designed into existing fluorescent luminaires or used to create totally new shapes and concepts. Its “notched” mechanical design gives a three-dimensional scalability for light-lines.

Features :

- Light Weight Easy Assembly
- Design-in Quick Expansion
- Suitable for Restricted Space

Applications :

- Commercial Lighting
- Stairway Accent Lighting
- Cabinet Lighting
