

## Direct-lit Light Bar Module

Direct-lit light bar features outstanding lumen output with low power consumption. With secondary optical lens on LED, the emitting angle can be widened so that the light bar presents excellent light uniformity. Direct-lit light bar is an energy-saving and high efficient solution for TV backlight, panel light and advertising light box.

### Features :

- High brightness & SMD LED module
- Secondary optical lens on LED
- Wide angle

### Applications :

- Panel light (600x600mm / 300x1200mm / 600x1200mm)
- Billboard
- Light box
