

EdiPower CAC Series

Edison Opto's EdiPower II CAC series is based on the ceramic substrate which can provide better thermal dissipation performance and excellent insulating properties. The high performance COB products can be applied in many fields such as LEDs light bulb, down lights, track lights, residential lighting and commercial lighting fixtures.

Features :

- High power operation
- Excellent light uniformity
- Free from sulfuration and better reliability

Applications :

- Office lighting
- Commercial lighting
- Residential lighting
