

EdiLine PLCC Module

The linear structure of EdiLine PLCC Series results in an easier heat dissipation requirement, making versatile fixtures design possible as well as an overall cost saving benefit. The special twin connectors design allows EdiLine PLCC to be assembled easily with screws in either serial order as a linear light source or parallel order as a planar light source.

Features :

- Linear Module Design
- Low Power Consumption
- Easy Installation with Screws

Applications :

- Contour lights
- Decoration lights
- Architectural lighting
