

17W AR111 Module

Edison Opto 17W AR111 Module series, with a COB LED, creates a high luminous efficacy and long life expectancy lighting source. The superior light quality is achieved by integrating condense light emitting area with an advanced lens design.

The unit is designed to offer lighting designers and users a direct replacement lamp in Edison LED power from conventional halogen lamps. As for the flexibility of illuminated area, the module is offered in four types of reflectors in order to provide four options of beam angles for different scenes. Moreover, the reflectors can be replaced by users easily.

Furthermore, the promising efficiency makes Edison Opto 17W AR111 Module the best choice for a wide variety of general illumination, task and accent lighting applications.

Features :

- Solid State Lighting Technology
- Superior Light Quality
- Ecologically Friendly

Applications :

- Pendant light
- Down light
- Commercial and residential lighting
