

EDIS IP68 Lighting Module

Edison Opto's 42 Wattage EDIS IP68 lighting module uses the high brightness LED—ET-3535 as its light source. With the special series connection structure, it can protect single-circuit structure of the full connection series, even open or short circuit doesn't affect current and voltage distribution of other LED, the other LED can work under the normal operating mode. Moreover, with the IP68 waterproof rating, EDIS IP68 lighting module is the ideal choice for outdoor lighting.

Features :

- High Brightness SMD LED
- Low Power Requirement & Energy Efficient
- Waterproof Level IP68

Applications :

- Street light
- Tunnel light
- Flood light
- High / low bay
