

EdiLex Area Lighting Module

EdiLex area lighting module are planar white-light LED modules. They are intended for luminaire manufacturers who want to replace linear fluorescent luminaires with LED solutions. The LED module can be designed into existing fluorescent luminaires or used to create totally new shapes and concepts. Its “notched” mechanical design gives a three-dimensional scalability for light-lines.

Features :

- Light Weight Easy Assembly
- Design-in Quick Expansion
- Suitable for Restricted Space

Applications :

- Commercial Lighting
- General Lighting
- Cabinet Lighting
