

EdiLex Spot Light Module (SLM)

EdiLex Spot Light Module (SLM) uses EdiPower II 9W~35W which are high brightness LEDs. Compared with the multiple single light sources, EdiLex Spot Light Module (SLM) utilizes the form of plane light source and has better performance in light uniformity. Besides, its specially designed holder and reflector make it easy to interchange different optical designed reflectors. Each EdiLex Spot Light Module (SLM) can be assembled easily into heat sink and lighting fixture.

Features :

- Thin holder and reflector design
- Light weight and easy assembly process
- Zhaga compliant : Standardized optical, mechanical, electrical and thermo interface

Applications :

- Truck light
- Spot light
- Down light
