

12W HR M32 Module

With EdiPower II HR LEDs, 12W HR M32 module is driven at 350mA and is capable of delivering illumination up to 1,000lux for all color temperature at 1 meter distance with a beam angle of 60 degree.

For thermal management, an immense heatsink with a large amount of fine fins structure is used to ensure distinguished heat dissipation. Besides, M32 HR module is designed as slim thickness as 32mm, and to model under restricted spaces where traditional lighting fixture is not small enough to fit in.

Features :

- Fully Integral Design
- Low Power Consumption
- Long Life

Applications :

- Spot light
- Down light
- Accent lightings
