

ET-1208

The lm/\$ and luminous efficacy of ET-1208 are superior to the components which are made by other major manufacturers. In cool white, ET-1208 can reach 670lm under 4~7 W (700mA) and 950lm under 7~10 Watt (500mA). Compared to the point light source products, ET-1208 series is a single light source which performs a better light quality. Moreover, its slim and miniature size makes ET-1208 suitable for being assembled in narrow or bent spaces.

Features :

- High luminous Intensity and high efficiency
- Wide viewing angle : 120°
- High CRI performance (CW 70/NW 80/WW 80)

Applications :

- Spot light, candle light, bulb and down light
- Residential lighting
- Commercial lighting
